

Xeriscape Garden

Completed 2007

Eagle Scout - Brandon Weller

Brandon Weller made the triangle plot by the east parking lot his project. This is an "island" in the sidewalk just south of the restrooms that used to contain a mature tree. The tree did not recover after the sidewalk construction was complete. In Fall 2006, Brandon killed off the weeds that growing there and then amend that soil. In Spring 2007, Brandon will research, select and plant a low-water, xeriscape garden. The garden will eventually contain educational signage and be used as a teaching tool for low-water landscaping.
